<u>Claims</u>

What is claimed is:

1. A method of providing electronic lottery games, comprising the steps of:

   transmitting a game identification number;

   transmitting game parameters associated with said game identification number to said game terminal;

   receiving data related to selections on said game terminal associated with said game identification number;

   calculating a win/loss value; and

   transmitting said win/loss value to said game terminal.

2. The method of Claim 1, further comprising the step of transmitting a selection of possible games wherein said game identification number and game parameters are associated with a game selected from said possible games.

3. The method of Claim 1, further comprising the step of crediting an account when said win value is a positive value.

4. The method of Claim 1, wherein said calculating step occurs after said receiving step.

5. The method of Claim 1, wherein said calculating step is performed for each possible selection associated with said game identification number.

10. A method of playing electronic lottery games, comprising the steps of:

accepting a lottery game selection;

receiving a game identification number and game parameters associated with said number;

accepting at least one gaming selection according to the rules of said selected lottery game; and

receiving win/loss value information based on said at least one gaming selection.

1
2

11. The method of Claim 10, further comprising the step of logging in to receive a selection of lottery games.

1
2

12. The method of Claim 10, further comprising the step of crediting an account when said win value is a positive value.

1 13. The method of Claim 10, further comprising the step of storing information
2   about said game on a database.

1 14. The method of Claim 10, further comprising the step of calculating a
2   win/loss value for said selected game.

1 15. The method of Claim 10, wherein said steps are performed by a wireless
2   station.

1 16. The method of Claim 10, further comprising the step of calculating a
2   win/loss value for each possible gaming selection of said selected
3   game.

1 17. The method of Claim 10, wherein said steps are performed in software.

18. An interactive services display and response system, comprising:

    a betting service provider; and

    a game terminal connected to communicate with said betting service provider;

    wherein said betting service provider is configured to transmit a game identification number, transmit game parameters associated with said game identification number to said game terminal, receive data related to selections on said game terminal associated with said game identification number, calculate a win/loss value, and transmit said win/loss value to said game terminal; and

    wherein said game terminal is configured to accept a lottery game selection, receive a game identification number and game parameters associated with said number, accept at least one gaming selection according to the rules of said selected lottery game, and receive win/loss value information based on said at least one gaming selection.

19. The system of Claim 18, wherein said betting service provider is further configured to transmit a selection of possible games wherein said game identification number and game parameters are associated with a game selected from said possible games.

20. The system of Claim 18, wherein said betting service provider is further configured to credit an account when said win value is a positive value.

21. The system of Claim 18, wherein said betting service provider is further configured to calculate a win/loss value for each possible selection associated with said game identification number.

22. The system of Claim 18, further comprising a network which facilitates communication between said betting service provider and said game terminal.

23. The system of Claim 18, further comprising a database which stores information associated with said game identification number.

24. The system of Claim 18, wherein said game terminal is further configured to log in to receive a selection of lottery games.

25. The system of Claim 18, wherein said game terminal is further configured to credit an account when said win value is a positive value.

26. The system of Claim 18, wherein said game terminal is further configured to calculate a win/loss value for said selected game.

27. The system of Claim 18, wherein said game terminal is further configured to calculate a win/loss value for each possible gaming selection of said selected game.

28. The system of Claim 18, wherein said game terminal configuration is a software configuration.

29. A wireless station, comprising:

at least one transmitter;

at least one receiver; and

a controller to control said at least one transmitter and said at least one receiver;

wherein said controller is configured to accept a lottery game selection, receive a game identification number and game parameters associated with said number, accept at least one gaming selection according to the rules of said selected lottery game, and receive win/loss value information based on said at least one gaming selection.

30. The wireless station of Claim 29, wherein said controller is further configured to log in to receive a selection of lottery games.

31. The wireless station of Claim 29, wherein said controller is further configured to credit an account when said win value is a positive value.

32. The wireless station of Claim 29, wherein said controller is further configured to calculate a win/loss value for said selected game.

33. The wireless station of Claim 29, wherein said controller is further configured to calculate a win/loss value for each possible gaming selection of said selected game.
